Favourite place in the UK: Dartmoor, I enjoy its remoteness and lack of human activity allowing you to walk for miles and miles in the wilderness.

Hobbies and Personal Achievement:

I spend my spare time photographing and filming wildlife, learning about the animals and their behaviour through first hand experiences. My passion for wildlife stems from a young age where I was constantly playing outside, feeding birds worms and waiting for the local robin instead of cleaning my room, I wanted to be an explorer!

Festivals and Events: I work a lot of Music events and festivals at the weekends when I can. When I am not filming or taking stills, I regularly work on the management stage and I am currently helping with plans for a new festival for 2015.
